Work Experience

Smarter Grid Solutions

June 2019 - August 2019

DevOps Engineer Intern

New York, NY

- Developed scripts to fully automate the provisioning and deployment of virtual machine environments
 - Provisioned virtual machines through Terraform scripting
 - Deployed company software and tools through Ansible Playbooks
 - Utilized Atlassian's Bamboo deployment/integration service to run the scripts
 - Developed scripts for both Amazon Web Services and VMWare
- Reduced the time necessary for developers to gain access to personal virtual environments
- Maintained and updated existing virtual infrastructure

Liberman Networks

November 2016 - June 2017

I.T. Technician Intern

Fort Lee, NJ

- Prepared workstations for clients by updating and verifying software
- Performed virtual data backups for company clients
- Assisted other technicians in on site support tasks such as resolving printer issues, installing new hardware, and performing network maintenance

Projects

Chatroom Website

October 2019 - November 2019

- Developed a web application where multiple users can send messages to each other in a real time chat
- Created features where users could create different chats, delete their own messages, and filter for specific messages within a chat
- Utilized real-time engine Socket.IO
- Stored messages and chats with MongoDB
- Front End developed in HTML5, CSS, JavaScript with Handlebars.js templating
- Back End developed in JavaScript with Node.js and the Express framework

Twitter Bot (@The_Thebot)

March 2019

- Developed a script that periodically posts Twitter tweets using the Twitter API
- Iterates a list of nouns and modifies each noun to create a humorous tweet
- Written in Python with the Tweepy library
